Harvey,

It is my understanding that all available geospatial data is in the operational viewer including the water sampling data, and that the JIC is still waiting for approval from D.C. to release a public facing viewer. We also have deployed Region 8's SADIE tool that allows for the integration of the analytic data with the geospatial data presented in the viewer. Here is the operational viewer which is **NOT** for public release.

Sure, copying our national geospatial support team on this. Who are you working with in Region 8? Also copying Region 8 GIS contacts.

Do you have an idea of how you want to present the data?

Harvey and Kim,

We're getting ready to go live with the spill web site for the Gold King Mine spill. On the call with the regions, the need for a way to map out the water sample data became pretty clear.

Can we engage your team to see what's possible with accomplishing this?
